##### Financial services

Lowering the costs of money transfers from your Payoneer account to Chinese suppliers.

# Samples inspection in China

## SAMPLES INSPECTION

You can choose the supplier without having to wait for the arrival of the samples to your country, so you save both the money for the international shipment of the samples and time needed to find the supplier.

Inspection of the samples is the only way to make sure that your goods meet the safety standards in your country.

### Can I participate in the inspection?

Yes, you can join the inspection virtually. It means that you will receive audio, photo and video data in online mode during the inspection. You can control the inspection process and communicate with the inspector during it.

### Can you consolidate several samples from different suppliers and send them to me?

Yes, we can send you the samples after the consolidation and inspection. In this case contract rate export tariffs with the highest possible discount will be applied to the shipment.

### What is the price of this service?

The service price is 50 USD. It includes one working hour of the inspector, providing you with photo, audio and video data. Every additional hour is +20\$.

The consolidation service price is 50 USD (including 5 samples or sets, every additional item is +5\$) + discounted shipping costs. In case you choose both samples inspection and consolidation you get a 10\$ discount.

Do you need sample inspection?

# Inspection of the goods on the factory

In China, India and South Korea

## INSPECTION OF THE GOODS

It allows you to make sure that the quantity and quality of the goods meet your expectations before the shipment. We also inspect the goods for compliance with Amazon standards.

The data from the inspection can be used during the negotiations with the logistics company, responsible for your shipment.

### What happens if the inspector finds a defect during the inspection?

In this case the inspector can engage in a dialogue with the supplier in coordination with you and negotiate all the details concerning the correction of defects.

### Can I take part in the inspection?

Yes, and this is highly desirable. We use special software to send you audio, photo and video data in the course of the inspection. It allows you to control the inspection process in online mode.

### Can I send you the inspection guidelines?

Yes, this is highly desirable. In case we do not receive guidelines from you, the inspector acts according to our inspection algorithm and common sense.

### Will I get an inspection report?

Yes, all the audio, photo, text and video data as well as the inspector's comments are saved in your phone after the inspection.

# Searching for suppliers in China

## SEARCHING FOR SUPPLIERS

**1**

Searching for suppliers on Chinese online platforms, such as 1688, Taobao and others

We look for products that meet given parameters to the maximum possible degree. As a result, you receive up to 5 business proposals, confirmed by the supplier's seal with limited period of validity.

**2**

Special project service

You provide us with all the information about the product you are looking for, including the expected purchase quantity. For this project you get your personal manager, who will negotiate all the details with suppliers (telephone calls, official correspondence, meetings at factories, inspection of the manufacturing process and the produced items).

**3**

Attending thematic exhibitions on your behalf

Every month we publish the list of exhibitions in China, which our employee can visit as your representative. You provide us with the list of requirements for the product and the supplier, ask all the necessary questions (price, minimum order quantity etc). Our employee visits the exhibition, makes an audit, collects advertising (promotional) materials, contacts and gets the answers to your questions.

## LOGISTIC SERVICES

In case you are an Amazon seller, we can be your partners in China. We offer logistics and inspection services.

We provide full assistance in solving any issuers, that may occur during the transportation of your goods from the pickup point to the amazon warehouse.

### How will it help me?

Your request for delivery is processed by our IT system, specially designed to control all the information flow concerning shipments, which substantially facilitates the communication process.

### Is it possible to consolidate my shipment with the others, in order to reduce transportation costs?

Yes, we can place your request in the special chart among other shipments awaiting consolidation, after you provide us with the necessary details about it. As a result you get clear visual information about the consolidation possibilities and the shipment dates.

### What is the price of this service?

The service price is 100 USD for the whole order. It allows you to save the time needed to negotiate all the details with the logistics company. Moreover, we work out the best delivery method in terms of transit time and service costs, based on your requirements.

# Financial services

## PAYMENTS VIA PAYONEER

It is implemented in case you want to lower the costs of money transfers from your Payoneer account to Chinese suppliers.

In addition, the supplier receives money transfer significantly faster after the inspection, as the payment in this case is made from our Chinese account. As a result, the shipment delivery time to the amazon warehouse is reduced.

- What is the price of this service?  
The service price is 3% of the transfer amount.

- What are the main benefits of this service?  
The delivery time to the amazon warehouse is reduced by 2-3 days. It also gives the inspector and you (virtually) the opportunity to be present during the pickup.

- How does it work exactly?  
Technically it is as follows: 2-3 days prior to the inspection you make money transfer to our Payoneer account and provide banking details of your supplier in China. After the inspection and your final confirmation we transfer this sum from our Chinese account to the supplier. It takes maximum several hours for the transfer to reach the supplier.

Shipment can be picked up right after the inspection.

Want to reduce the cost when paying to the suppliers?
